

Aziz Hillary

<https://github.com/maisonazy> | <https://linkedin.com/in/Aziz Hillary> | azizhillary@gmail.com | +254705512282

Skills

Programming Languages: Python | Javascript | SQL

Frameworks: Django | Frappe | Vuejs | NodeJs | Express | Flask | React | Nextjs | TailwindCSS

Miscellaneous: MySQL | Git | Shell | Docker | PostgreSQL | MariaDB

Soft Skills: Communication | Self-driven | Team Player | virtual assistant | copywriting

Experience

Software Engineer

- Applied Object-oriented programming principles to design modular and reusable code structures.
- Utilized Git and Github for version control ,managing project branches, and maintaining codebase integrity.
- Conducted system analysis to translate user requirements into functional software specifications.

Web Development

Full Stack Developer

- Designed and deployed end-to-end web applications,ensuring seamless integrations between the user interface and the server-side logic.
- Configured development environment using vite for high performance builds and hot module replacement.
- Managed cross-browser compatibility and optimised web performance for mobile and desktop users.

Frontend Focus

- Built dynamic ,responsive user interfaces using React and modern Javascript.
- Mastered CSS3 techniques including flexbox,grid,smooth transitions to create visually engaging and accessible designs..
- Implement state management and component-based architecture to enhance application scalability.

Back-end Focus

- Developed Restful APIs to facilitate communication between the frontend and databases.
- Managed data persistence and structure queries using SQL to ensure efficient data retrieval and storage.

Projects

Ecommerce-website

- Spearheaded the development and deployment of an e-commerce website of a particular mini-market that enabled customers to order and track their products easily by reducing frauds and enhancing efficiency.

Studyplatform

- A RESTful API that allows users especially students to upload ,categorize ,and search for academic resources or past papers easing congestion on libraries.

Hotel management platform

- Implemented a hotel management interface archiving users to easily order their menu and book for a reservation easily and it reduces time hence making it more flexible to enjoy the services.

Personal command center

- Integrated a weather API via OpenWeatherMap that enable users from different locations to monitor the weather of a particular place reducing weather forecasting and news broadcasting.

Education

Kenyatta University, Kenya

Sep 2024 -2028

Bachelors of Telecommunications & Information Technology

Am currently pursuing a Bachelor of science in Information Technology .My academic journey has allowed me dive deep into mechanics of both hardware and software--from analyzing semiconductor devices in the lab to building user interfaces with modern technologies including react and django frameworks.Am passionate about bridging the gap between complex engineering principles and functional user centric technology.

Relevant Coursework

Computer Science: Object -oriented programming,database management systems, data communications and network systems,system analysis and design and web development.

Academic focus: Currently maintaining a strong focus on frontend & backend development, Ai and machine learning.

Mathematics: Optimization, Discrete Maths, Probability and Random Processes, Number Theory, Linear Algebra.
